Freight Safety & Security

Air Expedite - Direct IATA Service

For your shipments that need to arrive as quickly as possible FSP provides air expedite freight service to every continent in the world. We are an IATA member assuring responsive service from all airlines globally and accurate documentation for your shipment. We manage the complete process; door to door, door to airport, airport to door, by handling all the transportation, documentation, customs, and provide complete visibility 24/7.

Aircraft Charter Service

FSP offers customers an alternative to scheduled transportation with air charter service for all contingencies, emergency situations, and unusual consignment sizes. As a Global Air Carrier we have an established network with dedicated charter options providing a wide variety of aircraft for complete door to door service. The aircraft charter option is specifically tailored to support international freight shipping that is focused on flexibility in accommodating our customer's specialized shipping & handling requirements.

Door to Airport & Door to Door

Convenient flexible service tailored for your needs. Door to Airport provides service from a customer's pick up location to destination airport and the service includes inland transportation to export point, documentation and pre-alert to consignee for custom's services for easy release at destination airport. Door to Door is an additional level of service which includes the delivery from the destination airport directly to your customers' business or home. FSP's proactive freight management team assists in every step of the transportation process to ensure a successful delivery.

**Convenient Scheduled Air
Consolidation Service**

FSP manages daily and weekly consolidation schedules from our regional export terminals leveraging volume to reduce costs to our customers. Air consolidation service provides the best rates available coupled with efficient and convenient transit times. The service is designed for the high volume shipper with scheduled departures as well as convenient for the low volume shipper which is able to leverage the scheduled departures to access a lower cost solution than shipping direct IATA.

Freight Safety & Security

Freight safety is FSP's #1 priority. Our cargo security program is certified by the TSA. We participate in C-TPAT and maintain contracted providers in CSA and FAST. FSP is an associate member of TAPA and enforces TAPA security guidelines along with our more stringent internal security processes.

**CUSTOMS
CLEARANCE**

ABI Customs Clearance

Bonded Cargo Clearance

Border Crossing Clearance
between US and Mexico

PARS Clearance (Pre-Arrival
Review System)

PAPS Clearance Pre-Arrival
Processing System

ABI Customs Clearance

FSP provides customs clearance for your shipments using the Automated Broker Interface (ABI) thru our US Customs Brokerage department. Benefits include: Expedited cargo release, Green Electronic transmission, validation, confirmation, and correction for entry summaries. Additionally, we offer payment options such as daily statement and electronic payment through the Automated Clearinghouse (ACH), validated duties, taxes, and fees, interactive communication with Customs, timely tariff updates, Query capabilities, and Uniform entry summary processing. All of these services are available to all customers regardless of shipping volumes.

Bonded Cargo Clearance

FSP provides worldwide Customs clearance of bonded cargo thru our Customs Brokerage department. While cargo is in transit FSP alerts the overseas terminal to coordinate clearance. Pre-advises are provided to the importers which include total charges and duty outlay to facilitate allocation of the necessary funds to cover the transportation costs. Additionally FSP identifies "trusted shippers" and processes trusted shippers for "fast lane" customs service. In the US, importers who belong to the C-TPAT program receive more expeditious clearance and preferred status throughout the customs clearance process. In the event of a national emergency where the borders are threatened "trusted" shippers are the first customers processed by U.S. Customs. FSP maintains a data base of preferred shippers for priority clearance privileges.

**Border Crossing Clearance
between US and Mexico**

FSP transports freight utilizing all Mexican / US border crossings including Nogales, Juarez and Nuevo Laredo and can deliver to consignees in the U.S. in two to four days. Service is assured utilizing our close relationships with Mexican Customs Brokers. We provide guaranteed 48-hour transit from Los Angeles to Monterrey and Guadalajara Mexico as well as 60 hours transit time from Los Angeles to Mexico City. FSP will reduce delays at the borders with proper documentation and customs filing which allows for the physical goods to move seamlessly across the border. We can provide door-to-door service on one invoice. We take full responsibility for the entire route and provide industry best transit times.

**PARS Clearance
(Pre-Arrival Review System)**

Canada's PARS (Pre-Arrival Review System) makes crossing the Canadian border take place in a matter of minutes, rather than hours by avoiding the delays of the normal border clearance formalities. PARS enable Canadian Customs to review shipments destined to the border gateway while they are en route. FSP ensures proper documentation so your PARS border crossing will go smooth. Customs brokers located at the border crossing clear our shipments 24 hours a day and provide the timeliest entry into Canada. By using FSP and PARS, a shipper can avoid transit delays, storage charges, and unnecessary interruptions in the supply chain.

**PAPS Clearance
(Pre-Arrival Processing System)**

The Pre-Arrival Processing System (PAPS) is a US Customs and Border Protection program designed to provide advanced information on goods entering the United States from Canada, expedite clearances, and reduce traffic congestion along the US/Canada border. Like PARS, the benefit is fast border crossing provided by FSP and the Customs broker 24 hours a day. FSP provides PAPS clearance for your shipments into the US. PAPS entry allows US Customs and Border Protection to perform risk assessment and clearance in advance of goods arriving at the border.

Warehousing & Inventory

Consolidation and Deconsolidation

FSP provides cost saving consolidation and deconsolidation services. Use with our scheduled air consolidation for a best value proposition for all shippers regardless of monthly volumes.

Cross-Docking

Driving cost savings FSP provides cross-docking services. Product is received into our facility, consolidated with other products going to the same region, and transported to destination at the earliest opportunity eliminating storage expenses as well as improving transit times in the supply chain.

Break Bulk

FSP provides break bulk service for all types of goods including LCD screens and laptop computers. Consolidated freight is received, broken down, inspected, stored, labeled, and then shipped to the ultimate consignee via various modes of transportation from parcel to truckload.

Distribution Center Bypass

FSP has a global network which allows direct distribution to the market in which your customer resides. In bypassing these distribution centers the delivery time and value retention is positively affected. One key to reducing damage and cost is to minimize handling. Our global network allows a customer to choose the direct route to market thereby minimizing delay, handling and damage to product in transit.

Drayage

FSP provides safe transport for your containerized cargo between ocean ports and rail ramps to break bulk facilities for processing forward in the supply chain. FSP maintains drayage agents at all ports to facilitate 20' and 40' container drayage to local facilities. FSP will coordinate the recovery of containers with customs brokers and the shipping lines to assure a streamlined and timely process. FSP also provides the same level of service for outbound containers both Customs Bonded Full Container Load (FCL) and Less than Container Load (LCL) to the port of departure.

In-Transit Storage – Free for 10 days

FSP supplies customers Free in transit storage for 10 days to provide coordination time for a superior delivery experience for your customer. Long term secure storage is always available at local and regional FSP terminals.

Pick & Pack

FSP provides Pick, pack, and ship options. The WMS (warehouse management system) is offered to our customers to manage all aspects of the warehouse, inventory and shipping process.

Specialized Labeling

As part of our robust pick and pack solutions FSP provides Customized labeling including labels with 4D barcodes and RFID tagging.

Value-Added Services

FSP provides our complete logistics menu for all aspects of continued transportation of warehoused products. FSP can be both the warehouse and value add carrier. By keeping the product with one logistics provider a company can maximize savings and efficiencies within the supply chain by eliminating paperwork, minimizing carrier base, and reducing handling while improving delivery times.

Visibility Real Time

FSP provides a higher level of visibility with our online real time tracking and immediate access to inventory information.

Warehousing & Inventory

FSP's global network of warehouse locations are all linked together to provide a secure, seamless value proposition for our customers. FSP supports all levels of technology from the latest bar coding, hand-held inventory management technology and customized cross-docking services to a robust and reliable Warehouse Management System (WMS), our customers have realized significant cost savings as FSP warehousing solution streamlines facility operations. FSP supports RFID and customer compliance, Inventory control, lot control, multi-level holds, catch weights, aging, and expiration dates. Real-time trace ability, Merge-in-transit, and cross-docking throughout our global network.

GLOBAL DOCUMENTATION

Export & Import Documentation

Consular Documentation & Legalization

Letter Of Credit Document Preparation & Presentation Services

Export & Import Documentation

FSP Customs Brokerage department can assist our customers in the global trade terminology and provide the required information including harmonized tariff numbers, export commodity control numbers, country of origin, Incoterms, certificates of insurance and units of measure. FSP supplies your customs broker with correct data to ensure an accurate customs declaration. International documents are key components to a flawless supply chain. Improper documentation can delay and even stop shipments. FSP provides to our customer's detailed information on documentation required per country of import or export as well as government agencies requirements. Imports may be subject to specific government agency requirements. In most countries, each agency establishes its own import regulations so detailed knowledge of all regulations is vital. In almost every case, customs will not release your shipment until you fulfill all government agency requirements. FSP provides the entire breadth of documentation to assure everything from insurance coverage in transit through to a smooth customs entry.

Consular Documentation & Legalization

Proper documentation services are vital in today's global supply chain. Documents issued in one country and intended for use in another country must be "authenticated" and "legalized" in order to be recognized as valid in the foreign country. FSP provides documentation service including legalization of shipping documents by the appropriate consulate, expedite chamber of commerce and foreign consulate signatures, and notarized Certificate of Origin.

Letter Of Credit Document Preparation & Presentation Services

Letters of Credit provide a valuable way to reduce financial risk. An estimated 70% of all Letters of Credit submitted to banks for payment are initially rejected due to incorrectly issued documentation FSP can create, present and manage all documentation required for an Export or Import Letter of Credit.
